

In the Specification:

✓
Page 7, line 5, replace "The object of the present invention is" with the following:

B1
--One aspect of the present disclosure discloses a liquid crystal display device that has first and second substrates opposing each other, a liquid crystal material disposed between the substrates, and a driver circuit having thin film transistors formed over the first substrate. The first substrate includes a pixel circuit for switching pixels of the display device. A resin is used to adhere the thin film transistors of the driver circuit to the first substrate. One use of this display device is--.

In the Claims:

Please amend the claims as follows:

B2
1. (Amended) A liquid crystal display device comprising:
a pair of opposed substrates, at least one of said substrates [being provided with] configured to include a pixel circuit for switching pixels of said display device;
